Floodplains Investigation Update

Hudson River Community Advisory Group Meeting February 17, 2011

Floodplains Investigation

- EPA and GE are evaluating the extent of PCBs in the floodplains of the Hudson River from Fort Edward to Troy
- Floodplain soil sampling results are being used as part of comprehensive study (Remedial Investigation)

 As generated, data is being evaluated to determine if interim response actions are needed in residential and recreational use areas

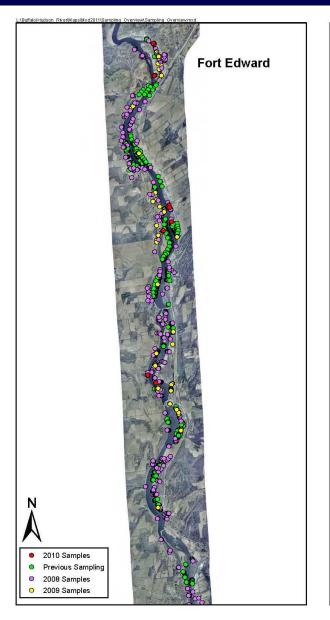

Floodplains Investigation Summary

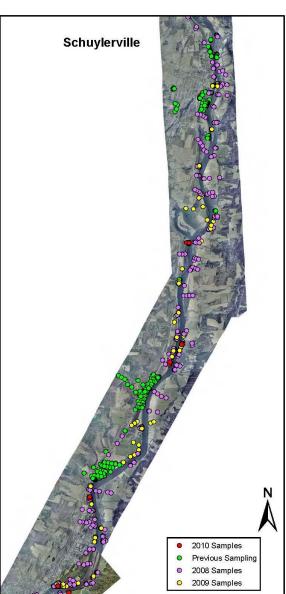

- 2000-2006: Approximately 1,500 samples collected by NOAA, GE, and EPA during initial investigative efforts
- 2008: GE and EPA collected > 2,200 samples at more than 1,000 locations on 280 properties
- 2009: GE and EPA collected > 900 samples on 100 properties
- 2010: GE collected 230 samples on 31 properties

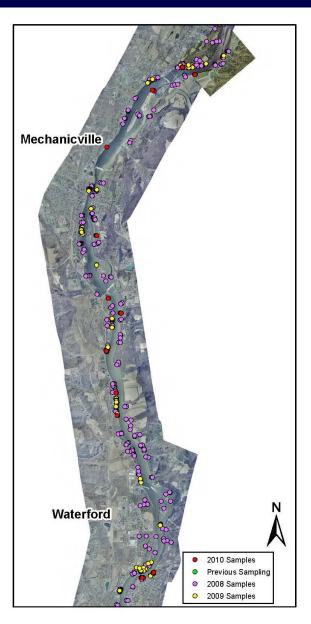

Floodplain Sampling Locations

2008 - 2010 Sampling Results

- Approximately 3,500 samples collected
- 80% of samples <1 ppm or non-detect
- 14% ranged from 1-10 ppm
- 6% samples >10 ppm
- 99% samples <1 ppm in agricultural fields
- The highest PCB concentrations are generally found in low-lying areas (flooded more frequently)
- PCB concentrations generally decrease as distance from shoreline increases

Completed Interim Response Actions

Conducted in human use areas that displayed higher PCB concentrations (>10 ppm)

Year	Temporary Caps	Signage
2007	12	2
2009	9	6
2010	14	7
Total	35	15

WARNING

SOILS IN THIS AREA ARE
CONTAMINATED WITH PCBs
(POLYCHLORINATED BIPHENYLS)
AVOID CONTACTING AND/OR
DISTURBING SOILS

FOR FURTHER INFORMATION
PLEASE CONTACT THE USEPA
FIELD OFFICE AT (518) 747-4389 OR
LOG ONTO THE USEPA HUDSON
RIVER PCBs WEBSITE AT
http://www.epa.gov/hudson

Summary

To Date:

- Approximately 5,000 floodplain soil samples collected on 395 properties
- 50 short-term interim response actions have been completed on 44 properties
 - 35 temporary caps
 - 15 warning sign postings

Next Steps

- Additional properties are being evaluated for sampling and interim response actions during the next season
- EPA and GE are discussing next steps in performance of the Remedial Investigation
