

## Literature Review on Toxicology of Polychlorinated Biphenyls (PCBs), 2002-2013

The following is a bibliographic listing of articles resulting from an extensive literature search, conducted during the period August-September 2013, on recent research regarding Polychlorinated Biphenyls (PCBs) during the period 2002 to present (2013). Research was narrowly defined as professional (peer-reviewed) journal articles relating to the toxicological effects on living organisms, which included human health effects, other aquatic and land animals, plants, microorganisms, etc. This literature search was conducted via the Virginia Commonwealth University Library system, specifically utilizing the BIOSIS reference database which includes abstracts of literature in biological and biomedical areas of specialty. The literature search also includes documents available in Environmental Stewardship Concepts, LLC's in-house resource files.

ESC, LLC makes no claims about the research in these citations and does not make any blanket claims as to their veracity, nor necessarily agree with the conclusions. We note that readers need to confirm that authors of scientific papers are free of conflicts of interest, financial or otherwise. We advise readers to determine if the authors receive funding from the industries or companies that may be affected by the results of their research.
